

EU-TYPE EXAMINATION CERTIFICATE

The following model of Personal Protective Equipment has been subjected to an EU-type examination in accordance with the module B of the PPE regulation (2016/425) and has been shown to satisfy to essential health and safety requirements.

Certificate N° 0075/1562/161/08/19/2388

Issued by CTC, Notified Body N°0075, to the following model of personal protective equipment :

Manufacturer : **CORTINA N.V.**
MEERSBLOEM-MELDEN 42, 9700 OUDENAARDE, BELGIUM
BELGIUM

Description

PPE Type : *an occupational footwear*
Product reference : **BESTLIGHT1**
Article code : **BLACK, WHITE**
Construction and material of outsole : **Injection, EVA+RUBBER sole**

Reference standard : **EN ISO 20347 : 2012**

Classification : II

Category : OB SRC

Size range : 36-46

Slip resistance : SRC

Toecap nature : N/A

Insert nature : N/A

At the date of certificate the product is in compliance with Annex XVII of REACH regulation (n° 1907/2006 and revisions)

Full description of the PPE, reference rules verified in the context of the EU-type examination and information given on the product are detailed in the manufacturer's technical file index 01 dated from AUGUST 2019

NOTA : Any modification to new items of the personal protective equipment object of this EU type approval certificate or any modification of the information contained in the manufacturer technical file which served for the deliverance of the EU type approval certificate (change of address, change of company status) should be brought to the attention of the notified body in accordance with Annex V §7.2 of Regulation 2016/425.

PROTECTION SCOPE

Basic requirements :

This product has been designed to be an occupational footwear.

The technical rules are :

European Standard EN ISO 20344 : 2011 Personal protective equipment - test methods for footwear

European Standard EN ISO 20347 : 2012 : Personal protective equipment - Occupational footwear

It is a category II product

Requirement of the standard EN ISO 20347 : 2012 concerning the value of the coefficient of friction of ceramic tiles floor with detergent solution and steel floor with glycerol (SRC)

Requirement of the paragraph 5.8.1. Design of the standard EN ISO 20347 : 2012 concerning cleated outsole.

At the date of certificate, the product is in compliance with Annex XVII of European REACH regulation (n° 1907/2006 and revisions)

MARKING - PACKAGING

Information printed on the footwear :

- * Logo of the authorized representative
- * Logo 
- * Manufacturer's type designation
- * Postal address of manufacturer
- * Footwear's reference BESTLIGHT1
- * Article code BLACK, WHITE
- * Size
- * Year of manufacture and at least quarter
- * The number and year of the Standard used
- * The symbol(s) of the additional requirements

Marking example :

The location of marking is : printing on the inner side of strap

Method of marking on the footwear :

printing on the inner side of strap

Packaging :

one pair in one inner box with wrapping paper

MEANS OF CONTROL

we control quality for our safety shoes as below:

When the raw materials arrive, the Q.C will pick up some samples from them for testing in accordance with revised standard EN ISO 20345:2011 and EN ISO 20347:2012, different materials are tested in different ways. Test leather with tear strength, tensile and PH/Cr VI, composite toe cap with impact resistance and compression resistance, mesh with tear strength and abrasion as lining, and so on. We have special Q.C. for leather, inspecting leather one piece by one piece. After the test, we use in production. Otherwise, it's forbidden to use them in mass production.

During production in factories, each procedure gets Q.C. supervising production. Material cutting, stitches, upper finish, sole injection, shoe tidying, packing, each working desk gets Q.C. there. If Q.C. find some problems, need to solve them at once, in order that no any problems will occur in finished shoes with good quality.

During the production, Q.C. depart. usually pick some shoes to test in each batch, like bond strength of the sole and upper, slip resistance and antistatic resistance.

Besides this, our customers have their own Q.C. in factories, we do the most parts of the work, but they are also important to the quality control. They supervise the quality of the factories and push us to improve.

PPE subject to ageing :

Peremption period : 5 years when stored in appropriate conditions (humidity, temperature, clean , ventilated, light). Before use, the footwear shall be visually controlled, in case of deterioration the footwear must be scrapped (abrasion, cut, tear, ...).

Declaration of conformity :
