CADOR S1 P

Sporty low-cut ESD safety shoe

Cador is a low-cut S1P safety shoe made of mesh, a slip resistant outsole that fulfills electrostatic discharge requirements and a steel toe cap and anti-penetration sole. Its main assets? Good quality in exchange for a competitive price. High wearing comfort – with optimum shock absorption in heel and forefoot – that puts an end to aching feet at the end of the working day. And a sporty and fun design with fashionable color accents, making it an ideal fit for both men and women. Of course with the same quality standards that Safety Jogger always guarantees and that allow you to work in complete safety. Ideal for light applications in the automotive, construction, industrial, logistics and engineering sector

S1P

You work in dry environments, no risk of water/liquid sprays, and you need protection for your toes, protection against perforation, and a good breathability? Then you need S1P safety footwear.

Electrostatic Discharge (ESD)

ESD provides the controlled discharge of electrostatic energy that can damage electronic components and avoids risks of ignition resulting from electrostatic charges. Volume resistance between 100 KiloOhm and 100 MegaOhm.

Airblaze technology

Moisture and temperature management system to provide optimum wearer comfort by keeping your feet dry and comfortable.

SRP slip resistance

Slip resistant soles are one of the most important features of safety and occupational footwear. SRC slip resistant soles pass both SRA and SRB slip resistant tests, they are tested on both steel and ceramic surfaces.

Steel toecap

Robust metal support to protect the feet of the wearer against falling or rolling objects.

Steel midsole

Puncture resistant steel midsoles are made from stainless or coated steel and prevent sharp objects from penetrating the outsole.

Industries:

Automotive, Construction, Food & beverages, Logistics, Industry

Environments:

Dry environment

Maintenance instructions:

To extend the life of your shoes, we recommend to clean them regularly and to protect them with adequate products. Do not dry your shoes on a radiator, nor nearby a heat source.
