#### 3D mesh

Three-dimensional produced distance mesh to provide increased moisture and temperature management.

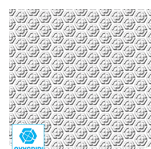

#### Electrostatic Discharge (ESD)

ESD provides the controlled discharge of electrostatic energy that can damage electronic components and avoids risks of ignition resulting from electrostatic charges. Volume resistance between 100 KiloOhm and 100 MegaOhm.

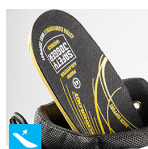

#### Heel energy absorption

Heel energy absorption reduces the impact of jumps or running on the body of the wearer.

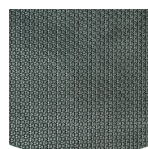

#### Oxygrip / SJ Grip

Rubber outsoles with Oxytraction® technology provide excellent traction on both dry and wet floors and meet SRC (SRA+ SRB) standards.

#### Removable insole

Renew your insole at a regular base or use your own orthopedic insoles for a higher comfort.

#### Rubber outsole

Rubber outsoles provide versatile functions that make them suitable for many areas of application: excellent cut resistance, heat and cold resistance, high flexibility at cold temperatures, resistance against oil, fuel and many chemicals.
